1st in Div. 1

HIGH-PERFORMANCE, WATER-BALLASTED

Designed with a powerful hull shape for blistering speeds on the race course, and with water-ballast so it can be sailed with a small crew consisting of only those needed to control the boat.

ULTRA-LIGHT CARBON

Lightweight structure achieved using the latest composite technologies including carbon fiber, toughened epoxy resins, and modern foam and honeycomb cores. Advanced construction techniques are used to increase accuracy and efficiency including high-precision CNC machining.

COMFORTABLE INTERIOR

Smart interior arrangement for family cruising with standing headroom, functional galley, and enclosed head.

ADVANCED OPTIONS

Achieve unparalleled performance using leading-edge designs and technologies including a tubercle rudder, lithium battery system, and retractable drive unit.

BUILT IN THE USA

Designed and built in the Pacific Northwest, a leading hub for the marine, aerospace, and composites industries. Care is taken to source domestic materials and systems, minimizing shipping costs and ensuring a higher level of quality and performance.

UNMATCHED TALENT

The latest Riptide 35 MKII came about through the collaboration of *Paul Bieker* (BiekerBoats.com), celebrated for his fast designs including leadership on Oracle Team USA, and renowned boat-builder *Jim Betts* who has a long track-record building some of the most advanced boats on the water including for the America's Cup, Trans Pac, Around Alone, and round-the-world cruising.
